EDUCATION

Virginia Commonwealth University, Center for Biological Data Science

- *M.S., Biological Data Science*

Richmond, VA

May 2024

Virginia Commonwealth University, School of Humanities and Sciences

- *B.S., Interdisciplinary Science (Biology), minor in Chemistry*

Richmond, VA

May 2022

SKILLS

Data & Analytics: Python, SQL (PostgreSQL), data validation, ad hoc analysis, data quality monitoring, reporting

Statistics & Modeling: Regression analysis, classification models, applied statistical analysis, Scikit-learn, TensorFlow

Tools & Systems: Linux, Bash/Zsh, data pipelines

Core Strengths: Data-driven decision support, trend analysis, analytical problem-solving, communicating insights to technical and non-technical teams

PROFESSIONAL EXPERIENCE

Market Research Analyst

DRB Group

Rockville, MD

March 2026 – Present

Operations Administrator

HNJ Group

Falls Church, VA

September 2024 – February 2026

- Promoted from a customer-facing role to support executive and operational initiatives across multiple locations.
- Perform ad hoc analyses and audits across payroll, financial, and marketing systems to identify trends and support leadership decisions.
- Review and validate data submissions from contractors and internal teams, ensuring metrics are consistent and reliable.
- Summarize findings and present key takeaways to leadership to support operational and strategic planning.

Research Data Intern

Virginia Commonwealth University, Center for Biological Data Science

Richmond, VA

May 2023 – May 2024

- Built and maintained Python-based data transformation pipelines for large-scale datasets, reducing manual work and improving efficiency.
- Managed full data lifecycle (ingestion, validation, transformation, and analysis) to support reliable reporting and insights.
- Applied statistical analyses to uncover patterns and translate technical findings into actionable conclusions.
- Prepared visual summaries and reports to communicate findings to faculty and research stakeholders.

Database Analyst

Virginia Commonwealth University, Life Sciences

Richmond, VA

January 2023 – June 2023

- Developed Python workflows to extract, clean, and integrate data from multiple sources, improving overall data quality.
- Conducted data validation and transformation to ensure datasets were suitable for analysis and reporting.
- Applied machine learning classification techniques to organize multilingual text datasets, improving accessibility and usability.
- Documented analytics workflows and data standards to support reproducibility and long-term use.
